Host Administrator

Within a XenDesktop site roles are used to group together permissions and can be combined with a scope to form an administrative right.

General Settings

Name	Host Administrator
BuiltIn	True
Description	Can manage host connections and their associated resource settings.
Identifier	b26e697f-1cd1-41c0-94b1-2cf99d377c30
Permission Names	Add Host Connection or Resources Add storage to Resources Delete Host Connection Delete Resources Edit Host Connection properties Edit Resources Enable/Disable maintenance mode of a Host Connection Essential write operations needed by every write permission Read Service status information Use Host Connection or Resources to Create Catalog View Host Connections and Resources

Machine Catalog Administrator

Within a XenDesktop site roles are used to group together permissions and can be combined with a scope to form an administrative right.

General Settings

Name	Machine Catalog Administrator
BuiltIn	True
Description	Can create and manage Machine Catalogs and provision machines.
Identifier	20852cdf-f527-4953-ba6e-e7545217122d
Permission Names	Add Machines to Machine Catalog Allow machines to be consumed by a Delivery Group Cancel Provisioning Task Change users assigned to a machine Create Machine Catalog Delete Machine Catalog Edit Machine Catalog Properties Enable/disable maintenance mode of a machine via Machine Catalog membership Enable/disable maintenance mode on Desktop via Machine Catalog membership Essential write operations needed by every write permission Manage Active Directory Accounts Perform Machine update Perform power operations on Windows Desktop machines via Machine Catalog membership Perform power operations on Windows Server machines via Machine Catalog membership Perform session management on machines via Machine Catalog membership Read Service status information Remove Machines from Machine Catalog Use Host Connection or Resources to Create Catalog View Host Connections and Resources View Machine Catalogs View Machine Details page

Read Only Administrator

Within a XenDesktop site roles are used to group together permissions and can be combined with a scope to form an administrative right.

General Settings

Name	Read Only Administrator
BuiltIn	True
Description	Can see all objects in specified scopes as well as global information, but cannot change anything.
Identifier	0a05f0c6-0153-4852-a55a-989d6a95c0eb
Permission Names	Read App-V servers Read Service status information Read Site Configuration Read StoreFront definitions View Activity Manager page View Administrators View Applications View Client Activity Manager page View Client Details page View Configuration Logs View Dashboard page View Delivery Groups View Filters page View Host Connections and Resources View Licensing View Machine Catalogs View Machine Details page View Policies View Trends page View User Details page

Senior Technician

Within a XenDesktop site roles are used to group together permissions and can be combined with a scope to form an administrative right.

General Settings

Name	Senior Technician
BuiltIn	False
Description	Provides the permissions for senior technicans
Identifier	f0b3b61c-0687-4b47-bfee-60d117e138ea
Permission Names	Add App-V publishing server Manage Policies Read App-V servers View Applications View Configuration Logs View Delivery Groups View Policies

Scopes

Within a XenDesktop site scopes are used to group together objects such as machine catalogs, and can be combined with a role to form an administrative right.

Name	Description	Built-In
All	All objects	True
Catalogs	Provides access to all machine catalogs	False
Xen Hypervisor Scope	Provides access to all Xen servers	False

All

Within a XenDesktop site scopes are used to group together objects such as machine catalogs, and can be combined with a role to form an administrative right.

General Settings

Name	All
Built-In	True
Description	All objects

Catalogs

Within a XenDesktop site scopes are used to group together objects such as machine catalogs, and can be combined with a role to form an administrative right.

General Settings

Name	Catalogs
Built-In	False
Description	Provides access to all machine catalogs
ID	5e9a89bc-6243-44f4-9656-db55aa727108
