T00721 - BREAKING: The minimum operating system for the Windows Basic Compliance Benchmark was changed to Windows 8, Windows Server 2012, or above.

Windows Server 2008 and 2008 R2 are no longer supported by Microsoft and are **no longer supported** for the Windows Basic Compliance Benchmark.

These operating systems continue to be **supported** as **scan targets**.

# T00713 - BREAKING: The "Processors" XML property for Windows machines has been renamed to "ProcessorsConfiguration". See E90762.

The processors information for Windows machines has been updated to include processor utilization information. Windows machines will need to be rescanned using the version 12.2 or above of the XIA Configuration Client for processor information to be visible.

**WIN-6JJ1BU7NE79 | Windows Server | 38710**

## Processors

Displays information about the processors found within this Windows machine as seen by the operating system.

---

**2 Processors**

Device ID	Name	Status	Cores
CPU0	Intel(R) Core(TM) i7-8850H CPU @ 2.60GHz	Enabled	1
CPU1	Intel(R) Core(TM) i7-8850H CPU @ 2.60GHz	Enabled	1

---

**Total Processor Utilization**

The graph displays processor utilization over a 19-second period. The y-axis represents Utilization % from 0 to 100, and the x-axis represents Time Elapsed (seconds) from 0 to 19. A small green peak is visible at approximately 12 seconds, reaching about 5% utilization.
