XIA Configuration Version 17.1

XIA Configuration Server version 17.1 includes:

- Documentation and reports now support Microsoft Word (DOCX) format in addition to Adobe PDF format.
- New document branding theme designer.
- Documentation is now generated asynchronously.
- Microsoft Word and Adobe PDF document files can now be digitally signed.
- Various bug fixes and improvements.

Upgrading from a version older than v17.0?

If you're upgrading from a version older than v16.1, please also check the previous version upgrade notes.

T10239 - PDF Output Settings

All "PDF Output Settings" and "PDF Color Settings" are now part of the new "Document Branding Theme" settings.

These settings are far more advanced and flexible than the previous PDF settings and cannot be migrated automatically.

Customers should review the new settings that are available and apply them to meet their branding requirements.

Document Branding Theme

The document branding theme allows for the customization of the look of feel of the documents created for items, reports, and report binders in both Microsoft Word document (DOCX) format and Adobe PDF format.

Apply Built-in Theme...

Edit Content Settings

T01212 - Citrix Farm (Classic) Deprecation

The Citrix Farm items (that support Citrix XenApp version 6.x) have been deprecated and removed.

For scanning Citrix XenApp, XenDesktop, and Citrix Virtual Applications and Desktops version 7.x and above please use the Citrix XenDesktop items.

T10236 – Active Directory Trusts

Additional information was added to the Active Directory Trusts class to simplify the visualization of domain trusts

This will require the domain to be rescanned with the latest version of the XIA Configuration Client to ensure that the details of the scanned domain are visible.

<https://www.centrel-solutions.com/media/xiaconfiguration/adminguideweb/ActiveDirectoryDomainListTargets.html>

T10218 – PDF Web Service Methods

The existing web service methods "GET_PdfOutput" and "GET_PdfOutputBasic" were replaced with "GET_DocumentationOutput" and "GET_DocumentationOutputBasic".

These methods allow for the generation of documents in Microsoft Word (DOCX) format.

In addition, these methods can now generate multiple documents (either in Microsoft Word (DOCX) or Adobe PDF format) and return the documents in a ZIP file.

For more information see the Generating Documentation topic in the help.
