Updated Relationship Visualizer

The relationships user interface has been replaced by the new interactive relationships visualizer.

The screenshot displays the 'Relationships' interface. At the top left, there is a logo and the title 'Relationships' with a subtitle: 'Provides a summary of the relationships between this item and other items in the environment.' The main area contains a hierarchical diagram. At the top level, there are five items: CSDemo-SQL01, CSDemo-SQL02 (highlighted in blue), CENTREL Solutions Demo, 24 x 7 Premium Support, and CSDemo-SQL. These are connected to a central node labeled 'sqlcluster.cent...'. This node branches into 'Nodes' and 'Roles'. Under 'Nodes', there are two server nodes: CSDemo-SQL01 and CSDemo-SQL02. Each server node is connected to two 'Cluster Network' nodes (labeled 1 and 2). Under 'Roles', there are two role nodes: 'SQL Server (MSSQLSERVER)' and 'User Manager Group'. At the bottom of the diagram, there is a zoom control showing '100%' and an 'SVG' button. On the right side, there is a sidebar for the selected item 'CSDemo-SQL02'. The sidebar contains the following information: Description: 'Demonstration SQL Server.', Type: 'Windows Server', Identifier: '6f309d7b-35fa-4116-8526-3576c2c7b6c7', Relationship Type: 'Has Microsoft Cluster Node', and Relationship Direction: 'Outbound'. A 'View Item' button is located at the bottom of the sidebar.

Scheduled Documentation Generation

Documentation generation can now be scheduled to run automatically as a [scheduled task](#).

Scheduled Tasks

This section allows tasks to be scheduled for automatic execution.

3 Scheduled Tasks

Display Name	Scheduled Task Type	Next Execution Date
 Execute Recently Created SQL Logins Report	Report Execution Scheduled Task	Wednesday, April 1, 2026 3:10 AM
 Generate Server Documentation	Documentation Generation	Wednesday, April 1, 2026 3:10 AM
 Usage and Diagnostics Data	Report Binder Execution Scheduled Task	Wednesday, April 1, 2026 10:00 PM

Refresh

New Scheduled Task

T10269 - The Entra data model update

As part of the [Entra Directory](#) redesign the Entra Directory data model was updated.

All classes – for example “CENTREL.XIA.Configuration.Types.EntraDirectoryApplications” were updated and renamed to simpler names such as “CENTREL.XIA.Configuration.Types.EntraApplications” for brevity.

Entra Directory items must be rescanned using the latest version of the [XIA Configuration Client](#).

T10275 - Exchange Online PowerShell

The [Microsoft Exchange Organization agent](#) now requires [Exchange Online PowerShell](#) version 3.9.0 or above.

T10252 - CENTREL.XIA.Support.dll library renamed

The CENTREL.XIA.Support.dll library was renamed to CENTREL.Support.dll. Customers using [dynamic agent plugins](#) will need to update the source code of these plugins to reflect the change.

T10280 - Unified Messaging (UM) was removed from Exchange organizations

The [Microsoft Exchange Organization agent](#) no longer supports reading Unified Messaging (UM) information as this technology has been deprecated by Microsoft.
