XIA Links Version 4.3

XIA Links Server version 4 is a completely rewritten product, with a range of improvements across the features.

- New improved user interface.
- New search function.
- New shortcut usage data functionality.
- New centrally managed client configuration.
- Improved security model with section inheritance.
- Improved installers.

Version 4.3 is a minor update which includes support for Windows 11 and Windows Server 2022.

Upgrading from version 3

Because [XIA Links Server](#) version 4 is a completely rewritten product please see the product documentation for full upgrade instructions.

Client File Requirement

Version 4.3 includes an updated client file requirement that can be used to detect when a file does not exist.

All clients should be upgraded to version 4.3 **before** implementing the new File does not exist functionality.
